

Kaan Osmanagaoglu

SENIOR ANDROID DEVELOPER | KOTLIN MULTIPLATFORM

+61 452 009 101 | kaanixir@gmail.com | linkedin.com/in/kaosmn | github.com/sdfgsdfgd | West Melbourne, VIC 3003

PROFILE

Senior Android engineer with 9+ years across payments/fintech, crypto, logistics and government. Expert in Kotlin, Jetpack Compose (+ Kotlin Multiplatform), shipping greenfield apps and modernising legacy stacks with scalable test automation.

SIGNATURE IMPACT

- Delivered Tip.mi Android and Compose Desktop admin apps to beta (Aug 2025), including Grafana/Mixpanel analytics.
- Modernised payment terminal apps with Compose + MVI, improving modularisation and long term maintainability.
- Expanded E2E automation with parallelised Maestro runners and upstreamed sharding support.
- Built PCI-ready payment products including PayWave and offline transactions.

CORE SKILLS

ANDROID	Kotlin, Compose, Coroutines, Room, biometric/keystore, deep links, notifications, NDK
MULTIPLATFORM	Kotlin Multiplatform, Compose Multiplatform, Kotlin/Swift bridges, React Native interop
ARCHITECTURE	Clean Architecture, MVI/MVVM, modularisation, legacy migrations
TESTING	Maestro E2E, unit/instrumented tests, SonarQube, CI automation
PLATFORMS	gRPC, REST, GraphQL, WebSockets, Firebase, AWS, Crashlytics, Sentry, Mixpanel, Grafana
TOOLING	GitHub Actions, Jenkins, Fastlane

EXPERIENCE

Tip.mi

Senior Mobile Developer (Contract) Melbourne | 2025

- Built a greenfield Android app in Compose plus a Compose Desktop admin panel with analytics surfaces.
- Implemented product analytics and dashboards across Grafana and Mixpanel.
- Led CI/CD with GitHub Actions and Fastlane, secure signing, staged rollouts and release automation.
- Migrated SwiftUI iOS to shared KMP and shipped the Android + Desktop MVP to beta.

Zeller

Senior Mobile Engineer Melbourne | 2023-2024

- Delivered Tap-to-Pay with Kotlin Multiplatform and a React Native bridge; supported PCI certification.
- Modernised terminal app architecture from RxJava/MVVM to Coroutines + MVI + Compose.
- Expanded E2E testing with parallelised Maestro runners; contributed sharding upstream.

Quest Payment Systems

Senior Software Engineer Melbourne | 2023

- Managed 4+ Android and management apps across the PoS suite, owning delivery and release quality.
- Met Android PayWave compliance requirements and secured payment processing licence approval.
- Co-designed PoS applications with Westpac, NAB and Officeworks with a focus on security and reliability.

Crypto.com

Senior Android Developer Melbourne | 2022-2023

- Core architect for the Crypto.com DeFi Wallet app, designing and maintaining the self-custody wallet experience.
- Partnered with Ethereum and Bitcoin teams on inter-blockchain bridges and cross-chain wallet flows.
- Coordinated closely with Shenzhen and Taiwan engineering teams to deliver complex wallet features across time zones.
- Drove bi-weekly agile cycles by reviewing new protocol research and integrating maths-heavy staking and pool logic with backend/blockchain teams.

Coles

Senior Android Developer (Contract) Melbourne | 2021-2022

- Built the Coles Express app from scratch including maps, geofencing, tracking and PayWave payments.

❖ EDUCATION

Bachelor of Science (Information Technology, Networks and Software Engineering),
Queensland University of Technology, 2015.

❖ RESEARCH

- Research Assistant (2014): one-time signature trees for post-quantum cryptography.
- Research Assistant (2015): GPS/GNSS positioning accuracy using real-time kinematics.

❖ ADDITIONAL STRENGTHS

- Payments and security: PCI, PayWave, secure key handling, encryption primitives.
- Cross-platform delivery: Android, iOS, Desktop and web targets.
- Comfortable with high-trust environments and regulated domains.

❖ EXPERIENCE CONTINUED

PTV (ARQ Group)

Android Developer

Melbourne | 2020-2021

- Architected complex UI flows and animations for the PTV (Public Transport of Victoria) app.
- Built the testing pyramid and delivery practices across Java/Kotlin, Dagger and Retrofit.

❖ EARLIER CAREER

Grabba International

Android Developer

Brisbane | 2019-2020

Built biometric verification apps for airports, law enforcement and banking; integrated with biometric scanning hardware.

Department of Defense (Praesidium Global)

Android and Robotics Developer

Sunshine Coast | 2018-2019

Developed UGV control apps, ROS/Lidar collision detection and backend integrations for sensors and networking.

ARQ Group / Suncorp Bank

Android Developer

Brisbane | 2017-2018

Delivered private banking app with Java/Kotlin, MVVM and Dagger; collaborated across identity and API teams.

Mobey

Android Developer

Gold Coast | 2016-2017

Led Android development for an on-demand delivery platform; implemented geofencing and push notifications.

RSA (EMC/Dell)

Software Engineer

Brisbane | 2016

Developed RSA BSAFE crypto libraries in C/ASM, Python build automation and HSM integration; built Android PoC apps for mobile security.
